

Dear Tara Bolettieri,

My name is Wesley Mui and I am a sophomore currently pursuing a double major in Computer Science and Applied Math and Statistics. I attended the Career Center group session on Friday, and I was intrigued by the variety of positions that the Career Center offered to undergraduate students. I was particularly interested in the Career Coaching Intern position, because I hope to not only help other individuals with their careers, but my own as well, with the goal of building my experience of working in a professional environment. I will be attending the information session next week to learn more about the other positions too! I have attached my resume to this email.

Best, Wesley Mui
